THE SEARCH
SETILive is taking the Search for Extraterrestrial Intelligence (SETI) directly to you! We present radio frequency signals LIVE from the SETI Institute's Allen Telescope Array (ATA) while it's pointed at stars that, based on Kepler exoplanet discoveries, have the best chances of being home to an alien civilization. We'll also be putting you "in the loop" where

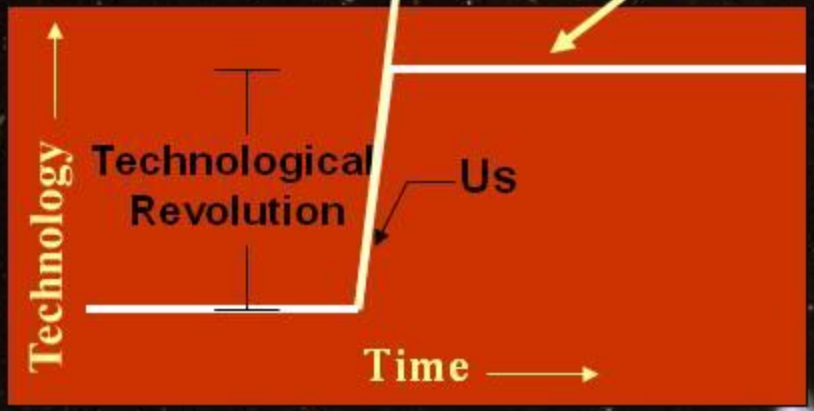
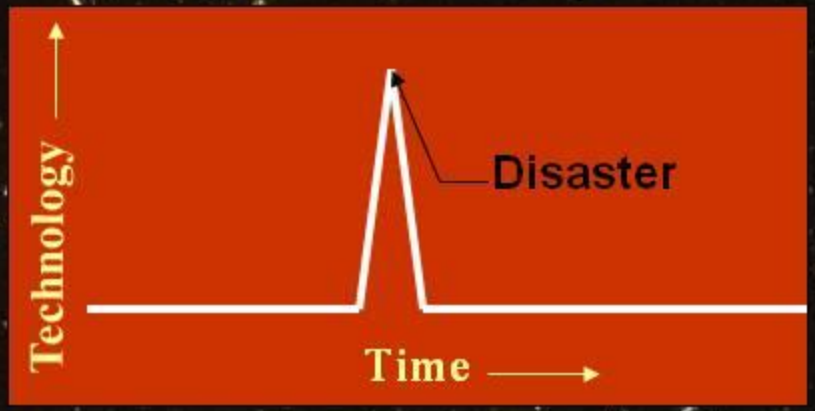
Any Detectable Technology Will Be Older Than We Are

If technology is long-lived, then we will find them here

If technology is short-lived, then we will not find them





Unless technology is long-lived, SETI will not succeed

The Search for ExtraTerrestrial ~~Intelligence~~

Not!

The Search for ExtraTerrestrial Technology

Shostak: “I bet everyone a cup of coffee that we’ll find aliens within 25 years”
